

X-Mine Community Outreach Event in Arnea, Greece

24 October 2018

Hellas Gold was organising an open presentation of the X-Mine project held on 24 October 2019, at the Cultural Center of Arnea, the historic capital of Aristotle's Municipality. Project's socio-economic and environmental aspects were in focus of the event.

Several partners of the X-Mine project consortium were joining the event at the Arnea Cultural Center.

The book of Nikolaos Arvanitidis, "Halkidiki Forged from Land and Sea", was presented and discussed as part of the event.

"Halkidiki Forged from Land and Sea" of Nikolaos Arvanitidis signifies the long-established contribution of region's mineral wealth to economic growth and society's progress. Here the metals have been extracted since the Macedonian times.

Hellas Gold X-Miners presented the technology innovations developed to be applied in exploration and extraction activities, and then on to be pilot-tested in Kassandra Mines targeting sustainable mineral development and responsible mining.

An essential part of people from local and nearby communities were actively engaged in the discussions
